

Sergii Karpov

Experienced QA engineer specializing in automation with a strong background in project management. Proven track record in leading successful teams and delivering technology solutions that drive business success. Proficient in TypeScript and JavaScript. Passionate about building user-centric applications and eager to take on challenging projects in innovative software companies. Motivated to work on challenging projects, I put my efforts into making the world a better place.

Projects

Healthcare startup, USA

October 2023 - up to now | Remote

Electron app and web app UI testing using WebdriverIO, TypeScript. API testing with Postman and Axios. Created test cases, analyzed existing test cases and identified suitable scenarios for automatization. Optimized and refactored existing framework, that increased test robustness and speed up to 60%. CI/CD - Azure.

Fintech company, EU

October 2022 - October 2023 | Remote

Maintained an existing WebdriverIO testing framework, automated test cases, tracked bugs, created test documentation. Overall, around 10K tests were running on numerous environments. CI/CD - Github.
